

## **UPDATE: Jean-Jacques Bienaime, CEO of BioMarin, to Present at the Goldman Sachs Global Healthcare Conference**

SAN RAFAEL, Calif., June 6, 2013 (GLOBE NEWSWIRE) -- BioMarin Pharmaceutical Inc. (Nasdaq:BMRN) today announced that Jean-Jacques Bienaimé, Chief Executive Officer at BioMarin, will present a company update at the Goldman Sachs Global Healthcare Conference on Thursday, June 13, 2013 at 10:00 a.m. PT. Interested parties may access a live audio webcast of the conference call via the investor section of the BioMarin website, [www.BMRN.com](http://www.BMRN.com). A replay of the call will be archived on the site for at least one week following the call.

### **About BioMarin**

BioMarin develops and commercializes innovative biopharmaceuticals for serious diseases and medical conditions. The company's product portfolio comprises four approved products and multiple clinical and pre-clinical product candidates. Approved products include Naglazyme<sup>®</sup> (galsulfase) for mucopolysaccharidosis VI (MPS VI), a product wholly developed and commercialized by BioMarin; Aldurazyme<sup>®</sup> (laronidase) for mucopolysaccharidosis I (MPS I), a product which BioMarin developed through a 50/50 joint venture with Genzyme Corporation; Kuvan<sup>®</sup> (sapropterin dihydrochloride) Tablets, for phenylketonuria (PKU), developed in partnership with Merck Serono, a division of Merck KGaA of Darmstadt, Germany; and Firdapse<sup>™</sup> (amifampridine), which has been approved by the European Commission for the treatment of Lambert Eaton Myasthenic Syndrome (LEMS). Product candidates include BMN-110 (N-acetylgalactosamine 6-sulfatase), formally referred to as GALNS, which successfully completed Phase 3 clinical development for the treatment of MPS IVA, PEG-PAL (PEGylated recombinant phenylalanine ammonia lyase), which is currently in Phase 3 clinical development for the treatment of PKU, BMN-701, a novel fusion protein of insulin-like growth factor 2 and acid alpha glucosidase (IGF2-GAA), which is currently in Phase 1/2 clinical development for the treatment of Pompe disease, BMN-673, a poly ADP-ribose polymerase (PARP) inhibitor, which is currently in Phase 1/2 clinical development for the treatment of genetically-defined cancers, and BMN-111, a modified C-natriuretic peptide, which is currently in Phase 1 clinical development for the treatment of achondroplasia.
